

# MASTER OF ENERGY & ENVIRONMENTAL POLICY

The Master of Energy & Environmental Policy (MEEP) in the Biden School of Public Policy & Administration at the University of Delaware combines rigorous academic studies, analysis and design of energy and environmental policies, and participation in public dialogues about the need for equitable futures.

Our Energy & Environmental Policy graduate programs are the first of their kind in the United States. These programs have earned international recognition for being among the top three programs in this field.

MEEP faculty and students work critically and analytically on issues of climate change, energy transformation, renewable and nonrenewable energy options, environmental justice, smart cities, and sustainable development.

## SPECIALTY AREAS

Students have 15 elective credits to use toward a specialty area of research, including:

- ◆ Energy Sustainability
- ◆ Water Sustainability
- ◆ Environmental Justice
- ◆ Political Ecology
- ◆ Global Environments
- ◆ Sustainable Development

## CAREER PREPARATION

Graduates of the MEEP program are equipped for careers in energy and environmental fields through courses focused on social science, science, engineering, and research methods related to the key sustainability challenges of societies throughout the world.
